Our Vision

A United World At Peace – Through Education

The Tenby Mission

- To enable students to:
 - achieve their full potential for academic excellence and achievements in sports and the arts
 - develop the values of compassion, responsibility and integrity.
 - become effective communicators, creative thinkers and independent learners.
- To encourage the values of cultural diversity and acceptance of others different from oneself.
- To promote the values of democracy, equality before the law and respect for The Universal Declaration of Human Rights.
- To promote international understanding for a peaceful world.

Our Core Values

- Education matters, it is central to all that we do
- International mindedness
- Lifelong learning
- Respect
- Sensitivity to cultural diversity
- Effective communication

Message from Leadership Team

The children are the most important reason we do our jobs at Tenby Schools. It is so wonderful observing them blossom as individuals, becoming unique personalities that reflect qualities that we have termed "Tenbyness", such as confidence without arrogance, taking risks, and having the ability to adapt and be resilient in different contexts.

Learning today is about 'learning to learn', having an emotional link, being an active learner, questioning, adapting and applying knowledge, skills and understanding to learning scenarios. Learning should be about experiences beyond the classroom. It's about joining in with the school community, applying ideas and leading initiatives, being involved in a range of opportunities, excursions, and experiences of the arts, sports, music, competitions and community services. It's about experiencing success and failure, and learning to deal with a range of emotions in preparation for life.

Children who are immersed within the Tenby Schools' ethos

are certainly exposed to such opportunities where they are supported with developing good decision making skills, learn to take accountability for their actions and are guided through developing strategies for coping with different emotions.

The learning environment enables students to explore international mindedness through topics taught within the curriculum and through exposure to activities beyond the classroom that allow students to integrate with one another e.g. Co-Curricular Activities, Model United Nations, Interact Club, Competitions, Tournaments, Excursions, overseas residential trips, celebrating different cultural festivities and making links with children in schools overseas. Embracing both the local Malaysian culture and celebrating the international cultures represented at the school enables Tenby students to develop as confident global citizens ready for the future. Tenby Schools is the school of choice to prepare your child for life.

Early Years (2+ to 5 years old) Available at Meru Raya Campus & Jalan Tun Dr. Ismail Campus

Children from as young as two plus join our Toddler classes in Tenby. They can look forward to new faces, exciting choices and fun hands-on activities in learning environments appropriate for this period of development. Play-dough and finger paint to touch, vehicles to ride, water to pour, toys to manipulate, obstacles to climb and songs to sing at music time, are some of the activities that toddlers will experience. With careful guidance from our dedicated and experienced team of teachers, the toddlers will go from wobblers to skilled walkers and runners. They will go from saying a handful of words to knowing 250 – 500 words and stringing together sentences! They will be moving from solitary play toward social play with their peers, through a well-planned and purposeful learning environment.

The Nursery and Reception years are known as the Early Years Foundation Stage because of the essential foundations laid down at this important time. Our curriculum is based on the British Early Years Foundation Stage (EYFS) curriculum incorporating the International Primary Curriculum (IPC) where appropriate. Within each year group there is an age appropriate balance of learning as a whole class, as part of a small group, as an individual or with a partner and children practise applying their skills, linked to their own interests and curiosities.

The teaching approach is through structured play that is planned with purpose to develop seven key areas in the EYFS:

- Communication and Language Development (English as the main medium with basic Chinese and Malay)
- Physical Development
- Personal, Social and Emotional Development
- Literacy
- Mathematics
- Understanding the World
- Expressive Arts and Design

Sekolah Tenby (ST) is a well-established premier Malaysian private school in Ipoh that offers the Malaysian National Curriculum for students from Standard 1 (aged 7) to Form 5 (aged 17). We are committed to educate our children to be active and independent learners in the acquisition of knowledge and skills in an international setting, within a safe and conducive environment.

At ST, we strive to create an environment where our students are competent in English, as well as Malay and Chinese. We are the chosen private national school in Perak approved by Ministry of Education to run the **Dual Language Programme (DLP)**. The DLP allows for English to be used in the teaching and learning of Science, Mathematics, and Technology Engineering (STEM) subjects. ST is also the only private institution in Perak to offer the HSK (**Hanyu Shuiping Kaoshi**) programme, a Chinese Proficiency Test which is an entry requirement for enrolment into any university in China.

We provide opportunities for our students to enhance their expressive communication skills through the learning of Music, Drama and Fine Arts. Students are exposed to problem solving and Higher Order Thinking Skills in all subjects. This enables each student to develop critical thinking skills and equip them with tools to prepare them for their further studies and social lives. As part of the school's Vision, ST develops character and leadership qualities through a range of opportunities through our academic, **C.A.S.E (Creativity, Action, Service & Enrichment)** and Co-Curricular Activities programmes.

Over the years, ST has shown impressive results in public examinations; Ujian Penilaian Sekolah Rendah (UPSR), Pentaksiran Tingkatan Tiga (PT3), Sijil Pelajaran Malaysia (SPM) and Cambridge Checkpoint where we have consistently ranked in the top three schools in Perak State. Students completing their SPM progress into our Tenby Sixth Form.

With our team of experienced and dedicated teachers, our students receive an education that will enable them to excel in all fields of life.

Dual Language Programme (DLP) at Sekolah Tenby

Sekolah Tenby has been given the approval to teach Mathematics and Science in English under the Dual Language Programme (DLP). The DLP is part of the Malaysian government's effort to uphold Bahasa Malaysia and strengthen the usage of English in schools. Only 300 schools across Malaysia have been selected (148 primary schools and 152 secondary schools) to participate in the programme. The programme supports and reiterates our ethos of providing national education with international approaches at Tenby Schools and our parents are strongly in support of this.

The Curriculum

The Primary School Standard Curriculum or Kurikulum Standard Sekolah Rendah (KSSR) and the Secondary School Standard Curriculum or Kurikulum Standard Sekolah Menengah (KSSM) emphasises on the development of future generations having a balanced set of knowledge and skills such as creative thinking, innovation, problem-solving and leadership.

Learners follow the KSSR and KSSM curriculum for eleven years, sitting for Primary School Achievement Test (Ujian Pencapaian Sekolah Rendah, UPSR) in Standard 6; Form 3 Assessment (Pentaksiran Tingkatan Tiga, PT3) in Form 3 and Malaysian Certificate of Education (Sijil Pelajaran Malaysia, SPM) in Form 5. The increased proportion of Higher Order Thinking content in the curriculum as well as in the summative assessments have gradually brought about a shift from recalling in learning to critical thinking that will prepare the learners for global competition.

While academic excellence in public examinations is a vital aspect of learners' success, we also conduct ongoing formative assessments that are used to gauge learner's progress. Assessment for Learning is an integral part of learning which enables close monitoring of learners' attainment based on the learning standards. From this, learners become more engaged and independent in their learning.

In preparing for learners of the 21st century, we offer a range of subjects at both Primary and Secondary levels.

The subjects offered at **Primary levels** are as follows:

- English Language, Bahasa Melayu and Chinese Language
- Science, Mathematics, ICT, and Design & Technology
- Islamic Education and Moral Education
- Art, Music, History and Physical & Health Education

The subjects offered at **Secondary levels** are as follows:

- English Language, Bahasa Melayu and Chinese Language
- Science, Biology, Chemistry, Physics, Mathematics, and Additional Mathematics, English for Science & Technology
- Islamic Education and Moral Education

- Accounting and Economics
- ICT, and Design & Technology
- Art, History, Geography and Physical & Health Education

With English and Bahasa Melayu as the main languages of instruction in learning, as well as the offering of different levels of Chinese Language lessons to learners of various backgrounds, learners in Sekolah Tenby are able to work well in a tri-lingual environment. On top of Chinese Language examinations in PT3 and SPM, there are also opportunities for learners to do the internationally recognised Chinese Proficiency Tests conducted by the Confucius Institute (Hanban).

The curriculum with strong foundations of languages, STEM knowledge and skills, and other supporting subjects has maximised the learner's' potential intellectually, physically, emotionally and spiritually, as reflected in the goals of the Malaysian National Philosophy of Education.

In Sekolah Tenby, we are committed in providing a wide range of activities that are differentiated and learner-centred, making the learning process in our school fun, meaningful and purposeful.

Students from the Secondary School progress to the Tenby Sixth Form on completion of their IGCSE studies where they are joined by students from other schools.

At **Tenby Sixth Form**, we offer the Cambridge International A-Level and AS-Level Programme, which is recognised worldwide as a gold standard for university admissions. The Sixth Form comprises both an 18 month (January intake) and 24 month (September intake) programme of study (Years 12 and 13) with students typically joining us at age 16 and completing their studies at age 18. During this time, we provide a high quality, secure and supportive environment with small classes that encourage our students to progress through A-Levels in a seamless manner. Students, upon application to the Sixth Form are given personalised guidance on which subjects to choose, by experienced university guidance counsellors who consider the career

path of the student as well as possible university destinations.

Tenby Sixth Form offers a broad range of A Level courses that are taught by experienced and highly qualified staff that will suit any career pathway:

- Business
- Economics
- History
- Geography
- English Literature
- Psychology
- Mathematics
- Further Mathematics
- Biology
- Chemistry

Students typically study 4 AS level subjects with 3 taken to A2 Level. Students from Tenby Sixth Form have gone on to study Medicine, Engineering, Business, Law, Accounting, Economics and Mathematics (to name a few) at top universities in Malaysia, Singapore, Australia, India, the United Kingdom and the United States of America.

A programme of Personal, Social and Health Education (PSHE) is provided to all students (Agama provision is made available for Muslim students), coupled to a supportive tutorial system that includes career and university guidance and **C.A.S.E (Creativity, Action, Service and Enrichment)**.

Opportunities are provided throughout the Secondary school for students to play musical instruments individually and as part of an ensemble; to perform in theatrical productions on the big stage; play individual and team sports at school, state and national level; to serve the school and wider community through the Student Council, Prefectorial Board, Houses, Interact, and as participants in the International Award; and to enrich themselves by participating in a variety of courses from cooking to first aid. All with the purpose of developing life-long transferable skills that support their academic studies.

Activities such as arts and crafts, photography, film making, performing arts, music and creative writing.

Physical exertion contributing to a healthy lifestyle, that complements the academic program of study such as being involved in an individual or team sport and taking part in outdoor education activities.

creativity

C.A.S.E

Creativity, Action, Service and Enrichment is a programme at the heart of the Tenby experience for all students.

service

C.A.S.E enables students to enhance their personal and interpersonal development through experiential learning. At the same time, it provides an important counter balance to the academic pressures of the rest of the Tenby educational programme. A good C.A.S.E experience will be both challenging and enjoyable and a personal journey of self-discovery. Each individual student has a different starting point, and therefore different goals and needs, but for many the C.A.S.E activities include experiences that are profound and life-changing.

action

enrichment

An unpaid and voluntary experience such as community service for a local, national or international charity, positions of responsibility and service within the school, involvement in fundraising initiatives, environmental club, student's council or house committees.

Activities that will aid in the development of key skills that will enable the student to develop into a productive member of the global community such as debating, public speaking, Model United Nations, First Aid, Life Skills, study skills.

Additional Services

Boarding for Secondary Students

Tenby School's Boarding House is located in a secure gated and guarded community adjacent to the school. We provide boarders with a happy, safe and supportive boarding environment where girls and boys are placed in separate houses, looked after by a Head of Boarding. The Boarding Programme is structured to support students in their studies at school and at weekends, there are planned activities. Boarders have access to excellent facilities and amenities. The Boarding House is fully air-conditioned with individual storage and study space, Astro and Wi-Fi services. Other amenities include: 25m x 12m swimming pool, sauna, gymnasium and a multi-purpose hall. There is an outdoor playground and a large field where boarders may play football.

The Learning Centre (TLC)

One of the Tenby Mission statements is that we encourage students to achieve their full potential for academic excellence and achievements in sports and the arts. We believe all learners should be equally valued, accepted and supported to become effective communicators, creative thinkers and independent learners. As such, TLC offers support for children who have additional learning needs. This may be with children who need a boost in English or strategies for learning a different way. This is delivered through guidance from our team of specialist teachers in TLC.

Facilities

- Science Laboratories
- IT Suites
- Library
- Multi-Purpose Hall
- Auditorium
- Swimming Pool
- Wading Pool
- Children's Playground
- Design & Technology Workshops
- Art & Design Studios
