ASSALAMMUALAIKUM AN INNOVATIVE ISLAMIC INTERNATIONAL SCHOOL IS FINALLY HERE!

We are IDRIS International School, an innovative International School offering a unique curriculum where the British international syllabus is infused with Islamic values and eco-awareness. Our main goal is to nurture our children into holistic individuals by integrating the knowledge and values of dunya and akhirah. Individuals who are sustainably and environmentally minded who practises Islam as a way of life.

A COMFORTABLE LEARNING ENVIRONMENT IN SHAPING OUR BELOVED YOUNG UMMAHs.

Located in the safe and quiet neighbourhood area of Setia Alam, IdriSSI International School provides a homely and comfortable environment for the students to enjoy learning. Alongside the international Cambridge curriculum, the unique IDRIS Learning System also combines with it an Islamia curriculum, Bahasa dan Alam (learning the Malay language with an environmental concept), Arabic, Value Education Programme (VEP), Entrepreneurship subjects and a range of extra-curricular activities such as the Eco Scouts, JASS Awards, robotics and many more. The IDRIS Learning System addresses students' multiple intelligences and individual learning styles.

A PLATFORM TO CARE AND EXPLORE THE ECO SYSTEM.

Our students are not just constrained to the classroom and text book learning environment but are also given the exposure to explore the world wide web and the opportunity to discover, explore and apply their knowledge vocationally in our non-conventional outdoor classrooms. With the Eco Scouts programme, nature is our students' main tool. Through patch farming, rainwater harvesting and recycling, they will learn about planet earth and how to care for the environment.

We also encourage active parents' participation through various volunteering opportunities and engagement to help enhance teaching and learning, as well as teacher-parent relationship. Working collectively with parents allows us to build a stronger school programme that is the blueprint to grooming successful citizens of tomorrow.

A WHOLESOME CURRICULUM

The IDRISSEI Learning System is both a practical and meaningful curriculum to provide our students with a balanced education that connects and engages them, rather than focusing on rote learning, memorisation and regurgitation. We nurture the love for learning, the desire to explore, and the ability to integrate lessons across all syllabus.

SUBJECTS OFFERED:

- English
- Mathematics
- Science
- Art
- Islamic Studies
- Malay Language
- Arabic Language

CAMBRIDGE INTERNATIONAL EXAMINATIONS

Idrissi International Primary School (Year 1 to Year 6)

- Key Stage 1 (KS1) – Year 1 and Year 2
- Key Stage 2 (KS2) – Year 3 to Year 6
- Focuses on core subjects of English, Mathematics and Science.

External assessment at the end of Key Stage 2 is through **Checkpoint Tests** administered by the Cambridge International Examinations.

FLiP (YEAR 3 TO YEAR 6)

FLiP is an Islamic Value-Based Financial Literacy Program customised for us by leading Financial Education provider MoneyTree Asia Pacific. Unlike most Malaysian schools who offer Financial Literacy as an elective or extra coursework, we offer the subject as part of our school curriculum. Our teachers are trained and certified by MoneyTree as financial literacy educators to instil in our students good money management and understanding of the correlation between earning, budgeting, spending, saving, debt, investing, and giving.

JUNIOR AWARD SCHEME FOR SCHOOLS (JASS) PROGRAMME

We are the first Islamic International School in Malaysia to offer both the DoE and JASS programmes. Both Awards are internationally recognised and will give our students an edge over the rest in their education portfolio. The Duke of Edinburgh's International Award (DoE) is an international leading achievement award programme available for our students aged 14 and above.

A similar programme offered to our 10 – 14 year old students is the Junior Award Scheme for Schools (JASS) programme. It is an accredited learning programme to develop students' wholesome individuality by offering recognition in four key areas – regular physical activity, exploring a personal interest, working for the good of the community or the environment, and completing an outdoor activity or challenge. The programme is fully aligned with current educational thinking and IDRISSEI's outdoor learning strategy.

ROBOTICS

IDRISSEI International School is the first international school in Malaysia to implement STEM with Robotics curriculum by Carnegie Mellon Robotics Academy, USA. The curriculum is accredited and certified by Global STEM Alliance (GSA) and International Technology and Engineering Educators Association (ITEEA).

The STEM with Robotics curriculum is an interactive and creative method in teaching STEM-related subjects due to its high level of engagement. By using STEM-friendly robots, students learn fundamental engineering concepts, design, building, testing, development and coding basics. Students are given the opportunity to develop robots to solve realistic everyday problems, which helps develop their interest in subjects like mathematics, coding, engineering, science and technology, all of which lead to innovation.
