NEWS UPDATE

August 22, 2019

Chickenpox and Influenza Outbreak

The health inspectors from the Health Department had come in to school on Thursday 16th, to do a health screening on everyone. Students, teachers and all staff were screened.

The Health Inspector from the Health Department doing the rounds taking everyone's temperature.

No one was spared. Even Mr Naza was not let off the hook.

Sanitisation of School Buildings

The teachers and staff of Sri Ara had been busy during the three days closure, sanitising the classrooms and school buildings. As recommended by the health officers, the cleaning and sanitising exercise was repeated for 3 consecutive days.

If any of your children have shown symptoms of chickenpox during the school closure, please keep them at home until their scabs have fallen off and are therefore completely free of the chickenpox virus so as to ensure there is no further outbreak. We appreciate your cooperation.

In view of the fact that some children are still unable to be in school, we are postponing the assessments and trial examinations to next week.
