

# WHAT MAKES THE LFKL UNIQUE?

Established in 1962, the French School of Kuala Lumpur (LFKL) is a non-profit school, managed by a board of elected parents. The school has signed a convention with the AEFÉ (Agency for French Education Abroad) and benefits from the support of the French Authorities. AEFÉ is a unique and worldwide network of almost 500 French schools in 137 countries with a total number of 335 000 pupils, two thirds of whom are non-French citizens.

## Diversity

**730 pupils  
from 47 countries**

## Excellence

**100%  
Success rate**

## AEFE Worldwide Network

**496 French Schools  
in 137 countries**

## Global Opportunity

**45% of our alumni  
are studying outside of France**

The LFKL welcomes pupils from pre-elementary to high school in an international learning environment.

The school is open to non French speaking children, from any nationality, from the age of 2 and a half to 6 years old.

Students benefit from a high standard education that includes cultural, artistic, technical, scientific, literary, sports and extra curricular activities at very affordable school fees.

We provide a multicultural education with qualified French teachers attached to the Ministry of National Education and professional English native or local teachers.

Pupils follow a French curriculum leading to the French Baccalauréat. Every year the school is visited by inspectors from the French Ministry of National Education to make sure it complies with the French curriculum.

Multilingualism is central to our curriculum. We take into account the students diversity to provide an adapted curriculum throughout their schooling.

Foreign languages are taught as early as the pre-elementary classes through educational activities by group levels.

Secondary school students have the opportunity to learn several languages: **English, German, Spanish, Malay, Chinese and Latin.** Every year they are given the opportunity to take language exams and receive international language certifications (**Cambridge Exam, IELTS, DELF, DELE, HSK**). Most of them become bilingual or trilingual at the end of their studies.

Students achieve outstanding academic results at the French Baccalaureate (2018 session: 100% success, 83% of our students graduated with honours) and are entitled to join the world's most prestigious universities worldwide. They have the opportunity to, either carry on further education in France, or elsewhere in the world.

In 2018, 55% of them joined universities or institutions in France and 45% in a different country. Scholarships can be granted by the AEFÉ to excellent foreign students who have passed their "baccalauréat" with distinction and have chosen to carry on their studies in France through the Major-General Grants of Excellence.

Every year, the LFKL participates to the PROZAP (Asia Pacific Zone Projects) organized by the AEFÉ. It has been almost 15 years that ten LFKL students participate to the **MYMUN** and **SIMUN** conferences that gather international schools from different Asian countries. Students are invited to debate in English on various topics such as politics, economics, social and environmental issues.

Our Grade 6 and 7 students also participate in the interclass junior competition of “**Mathematics Without Borders**”, a test of 9 scientific exercises, one of which must be solved in a foreign language.

This competition is a great challenge for students, demonstrating their teamwork, initiative, motivation and research.

Primary and secondary school students are invited to work, exchange together, and practice the use of a foreign language in mathematics.

The LFKL encourages the venue of French artists, last year the school received the visit of the street art artist **HeRsK** well known for his **Eskimo Ice Pops** series and **Jeremi CA** a multifaceted contemporary artist.

In December 2018, the LFKL launched once again the **Azimet** and **Segalen** literary prizes. A selection of young novels was offered to our elementary and high school students. As part of the project, the school will be welcoming **Cédric Janvier**, one of the authors of our 2019 book selection.

In 2016, the LFKL organized the 4th Asian Pacific Swimming Championship (CAPN). During 4 days of competition, the establishment welcomed 10 teams and 300 swimmers gathered for the event, coming from the French Schools of Shanghai, Phnom Penh, Bangkok, Hong-Kong, Vientiane, Singapore, Jakarta, Pattaya and Sydney.

This year, the LFKL will participate to the 8th CAPN edition that will take place in Singapore.

High school students attended the Badminton Championship in November 2018 in Jakarta and went to the Dubai Golf Games for a multi-sport competition with an outstanding ranking. They will also participate to the 3rd Rugby Clover tournament in Tokyo in September 2019.
