Kolej Yayasan UEM is proud to be the inspirational focus of **outstanding learning...**

The importance of selecting the right college is the stepping stone to a brighter and stronger future. As a premier college teaching Cambridge 'A' levels with a dedicated and experienced staff ensures that all our students have the opportunity to achieve their best possible results.

The students at KYUEM are supported and guided to assist them in selecting the right subjects to achieve their goals in gaining acceptance to the University of their choice in the subject of their choice. This is not an easy task as it dictates the student's future for many years to come. We at KYUEM are proud of the fact that not only do we have a first class University placement department but that we have the support of our Board of Governors who readily give of their time to prepare students for the University interview process.

The location of the campus ensures that focus is maintained on study and team work. There are many opportunities for the students to engage in helping others either within college as part of a team with its own objectives and outcomes or as part of a group that looks to the external community to see how they can help.

Obviously students will want to help and be part of all the clubs and activities within the college, however, we guide and advise students to monitor their time and plan their study schedules to ensure that they are ready for the external exams. This is monitored through the student services department that works with the students directly and through the teachers who are also designated as tutors. The tutors keep the students focused on their study but also monitor for signs of any issues that might impinge on the student's performance.

The highly experienced and dedicated teachers ensure that each student is encouraged to achieve their full capability. With the help of the academic department monitoring grades they will quickly identify a student who is underperforming and discuss the issue with all the departments involved including the head of department and teacher of the subject but also student services.

As a fully residential campus the integration of free time and study time is an important balance. By offering a variety of activities the college maintains a high standard of engagement that is supported through an effective and caring team of house parents, student services and tutors. By working together they provide the pastoral care that supports the home like atmosphere to allow students to feel comfortable, safe and supported.

The excellent support staff who are on constant call and ever vigilant in maintaining the physical aspects of the college and its living quarters provide the relaxing and pleasant environment that is the hallmark of KYUEM. The cleaning and laundry services ensure a healthy physical space whilst the dining hall and cafeteria aim to please the student's dietary needs.

Kolej Yayasan UEM focuses on the whole student giving them the opportunity to take on responsibilities whilst ensuring that their academic attainment is maintained at the highest possible level. This is why we are known as a premier college in Malaysia and internationally.

Peter Hodge
Principal

We ensure the **highest quality of learning** for our students through a rigorous learning process as applied by our selection of **experienced teachers...**

With over 12 years of unparalleled academic excellence, Kolej Yayasan UEM (KYUEM) continues to retain its position as one of South East Asia's top A-Level colleges, attracting only the very best students from all over the country.

Strategically located away from the hustle and bustle of the city, our location in tranquil Lembah Beringin provides a conducive and supportive environment for overall student development, maximizing the local community in shaping up the development of well-rounded scholars, as aspired in the National Education Policy. We take pride in consistently adding more value across the academic and operational value chain whilst striking the right balance between operational efficiency and high-quality delivery.

At KYUEM, in collaboration with Cambridge Assessment International Examinations (CAIE), we ensure the highest quality of learning for our students through a rigorous learning process as applied by our selection of experienced teachers. Our teachers, both local and international, have successfully and consistently produced world top in the world scholars in various disciplines year in, year out.

We believe that the true definition of success goes beyond academic achievements. Thus, we strive to create a balance between emphasis on academic excellence and necessity for holistic student development. The development focus for students at the Kolej is to not only develop their intellectual rigor but also for them to one day become effective contributors to society.

To realise this focus, students are given the resources and support needed to succeed academically, whilst being given room and opportunities to develop in other areas. Additionally, they are able to challenge themselves in a healthy and competitive environment, where they'll be able to learn from one another as well as acquire the experience and knowledge needed to build a solid foundation for their future.

I will pen off now by welcoming potential students to KYUEM. We promise you that your potential will be harnessed to its maximum.

Syamsul Rezdi Zainudin
Chief Executive Officer

Delivering An All-Round Education

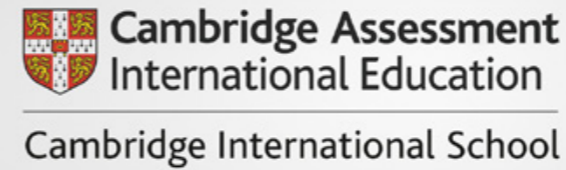

We nurture and encourage innovation, with the intention of producing individuals who will learn, adapt and think creatively. We produce **high performing all-round students** who have the pre-requisites to progress to the world's best universities and colleges.

Top Quality Pre-University Education

Kolej Yayasan UEM (KYUEM) is a premier Malaysian residential college that specialises in providing top quality pre-university education, in preparation for successful entry to the world's best universities and colleges.

In the past decade a significant number of our graduates have successfully entered Oxford and Cambridge, and countless others have entered other top universities around the world such as Imperial College, The London School of Economics and University College London. Our high success rate of placing students at these prestigious universities has been the envy of many of our global and regional competitors.

Cambridge International Fellowship

We are also one of the few select colleges in the region granted the Cambridge International Fellowship, giving us preferential access to their varied support systems. This also means our students will benefit from experiencing a truly international education, knowing that their qualifications will be recognised by educators and employers all over the world.

Award Winning Students

Our students have consistently won awards for excellence in AS and A Level studies, including CIE Cambridge Brilliance Awards and 'Top in the World' awards in Biology, Physics, History, Mathematics and Further Mathematics and Marine Science. Our successes have earned us a reputation for excellence in all aspects of our academic work.

Courses Offered

We offer courses in Cambridge International Examinations (CIE) A Levels. There are three academic streams:

Arts, Mathematics and Science.

Our students can take three or four subjects to A Level, in almost any combination. The A Level subjects offered are Accounting, Biology, Chemistry, Economics, English Literature, Further Mathematics, Geography, History, Marine Science, Mathematics and Physics.

We also provide classes in Malaysian Studies, Islamic Studies, Moral Studies, Bahasa Kebangsaan and course in key skills such as IELTS, an internationally recognised English Language qualification.

Tranquil Surroundings

The college offers tranquil surroundings in which able and highly-motivated students can **study without distractions.**

Accommodation & Amenities

Students are mainly housed in comfortable 4-bedroomed villas, 2-bed chalets and an apartment block which give the campus a distinctive 'resort-style' atmosphere. Among facilities and amenities available to students are a dining hall, cafeteria, television rooms, cyber lounge, sick bay, Surau (approved Friday prayers by JAIS), large sports complex, a 50-metre swimming pool and a fullyequipped fitness gymnasium. For outdoor recreation, there are two games fields, tennis courts, two squash courts and a huge expanse of local greenery for jungle trekking and off-road cycling.

House System

To nurture a spirit of competitiveness, students are organised on a "house system" basis with four houses. Annually, inter-house competitions are organised, including athletic events, track and field events, football matches and rugby tournaments.

Extra-Curricular Activities

Ensuring that our students gain an all-round education experience, apart from sports activities, we also offer drama and a wide range of clubs and societies to meet their diverse interests.

Student Council

Students benefit from an elected Student Council that represents the concerns of the student body. The Student Council's executive committee meets with the college's Headmaster every week to discuss issues and suggestions brought up by the students covering everything from food to religion.

World Class Facilities

KYUEM is well-endowed with world class facilities that **encourage academic learning and character development.**

Knowledge Beyond The Syllabus

The Resource Centre is well stocked with a good selection of books that supports A Level teaching. There is also much background material for students who want to extend their knowledge beyond the syllabus.

Student-Centred Learning

Our facilities need to support a high quality learning environment for over 500 students, all of whom are demanding, active learners who have moved beyond the 'passive acquisition' stage in their educational development. In other words, in addition to providing high quality teaching, we also need to support what is currently called "student-centred learning". The heart of this support is our Resource Centre, purpose-built to enable effective research and quiet study. It includes a generous library, containing multiple copies of all recommended texts, plus many others essential for the wider reading and research leading up to effective university application.

The whole compound offers accessibility to internet, including in all student accommodations, pivotal especially for those late night study sessions, but many students prefer to bring their own laptop computer that can be linked to our campus Wi-Fi network.

Continual Facilities Improvement

Our campus, set in an extensive 'greenfield' site three quarters of an hour from Kuala Lumpur, provides everything a student needs.

In terms of classrooms, we are generously endowed, with ten science laboratories, two large lecture theatres, and a wide range of general purpose classrooms. Improvement of facilities is continued. Every teaching room is equipped with a computer and LCD projector.

The Making of Top Achievers

We believe top achievers are not born but made. That is why we measure our achievements by the success rate of student placement in top-ranking universities mainly in the UK, US, Australia and Ireland. We have proudly produced some of the best students in the world.

Testimony of our achievement is a string of top scores in the country and in the world, for Accounting, Biology, Chemistry, Economics, Further Mathematics, Marine Science, Mathematics and Physics, amongst other subjects. A number of our students have received awards from Cambridge Assessment International Education.

We have also been named as one of the top centres for Cambridge Assessment International Education, with a high percentage of our students consistently scoring at least three As. A student needs at least two As to enter a top-ranking university in the United Kingdom, and most of our students make the cut.

We take great pride in our excellent success rate of student placement in the top ten UK universities, Ivy League US universities, Group of Eight Australian universities, and the Irish Medical Consortium. Many of our students have successfully entered universities such as Oxford, Cambridge, Imperial, LSE and UCL as well as top class universities in the United States including MIT, Princeton, Stanford and Australia.

The college functions like a family unit making you feel at home, seeing to your every need...

Mohd Khalid Khairullah
Mathematics & Statistics,
Brasenose College, Oxford.

This college, with its extremely dedicated staff, gave me the opportunity to do things I may not have been able to do elsewhere and to achieve my dreams. A truly fulfilling experience indeed...

Leela Devi Mariappen
Medicine, Robinson College, Cambridge.

The College has surpassed my expectations as a student. I couldn't be at a better place! It's a pleasure to be here. My two years have been an education for life...

James Khoo Swee Beng
The highest scorer in the world in two A Level subjects.
Medicine, Christ's College, Cambridge.

KYUEM has provided me with a holistic education, thus enabling me to explore my potential to the utmost...

Nurul Izza Idris
Law, University College, London.

Come, Compete and Grow

Our stringent criteria for choosing the right kind of students to join us in Lembah Beringin ensure a healthy competitive academic environment for our scholars.

Students are expected to have good academic ability. A Levels are challenging and students must have **good numerical skills and a high standard of English.**

Admission

Students must have obtained the following minimum scores in their five best subjects excluding Malay Language, Islamic/Arabic/Moral Studies and Arts. We recommend that students gain A grades in at least five main SPM/IGCSE subjects.

	SPM	IGCSE
ARTS STUDENTS		
English	A	A
Mathematics	A	A
3 other principal/core subjects	B+ (in 2 out of the 3 principal/core subjects, with B in the other)	B (in 3 principal/core subjects)
SCIENCE STUDENTS		
English	A	A
Mathematics	A	A
Additional Mathematics	A (but if not intending to study Engineering : B)	A (but if not intending to study Engineering : B)
Physics	B+ (in 2 out of 3 subjects)	B (in 2 out of 3 subjects)
Chemistry		
Biology		

Programme & Student Intakes

KYUEM has two programmes. These are:

- An 18 months A Level programme starting January
- A 24 months A Level programme starting July

Students who have qualifications other than SPM are invited to apply. Students must be active in co-curricular activities. Selection for the 18 months programme that starts in January will be based on trial exam results.

Subjects Offered

ARTS

- Accounting
- Economics
- English Literature
- History
- Geography

SCIENCE

- Biology
- Chemistry
- Physics
- Marine Science

MATHEMATICS

- Mathematics
- Further Mathematics

Outstanding Alumni

KYUEM alumni can be found around the globe as successful contributors to society, education, business, and the arts.

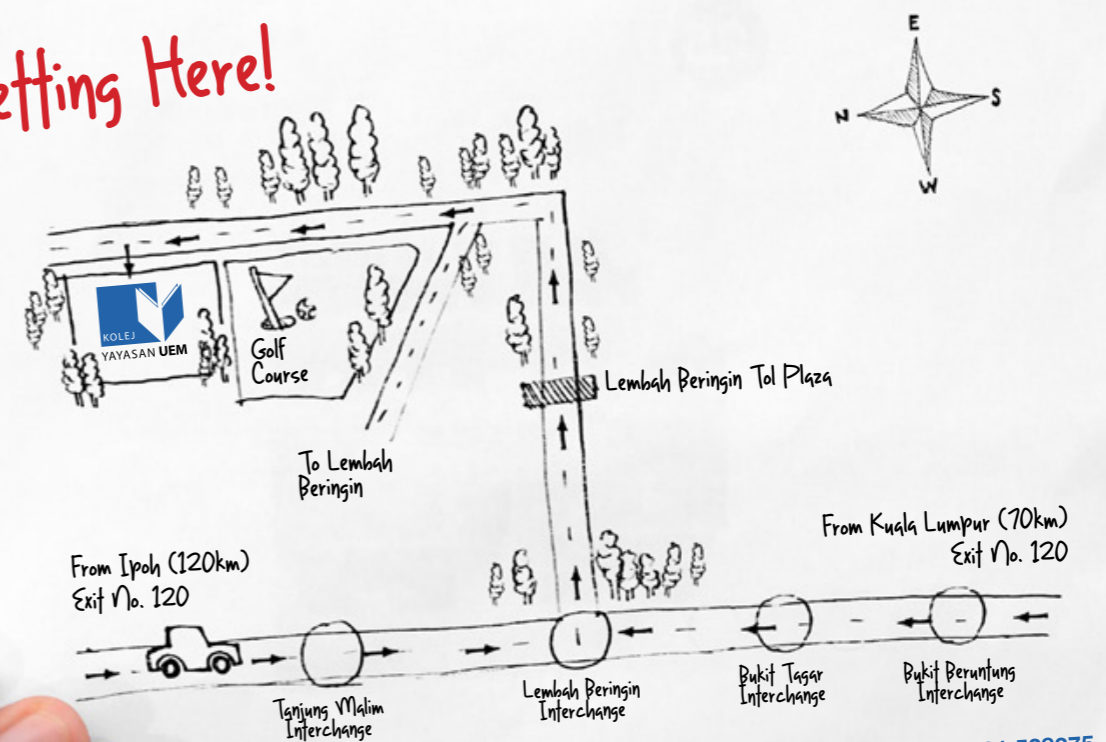

There are now thousands of KYUEM alumni, studying and working around the globe. Bound by shared experiences of social responsibility and challenging educational opportunities, this broad network of KYUEM alumni is a resource for current students and recent graduates looking for advice about internships, research opportunities, and careers.
